The human right to maintain personal control over our bodies, life decisions, sexuality, gender identity, and the choice to reproduce.

Disciplines in technical rhetorics are well positioned to take up inclusive and intersectional reproductive justice-informed projects. These disciplines allow for analyses that center on the lived experiences of those who are involved in systems of reproductive care, while also considering how these same systems have excluded marginalized populations from the dominant narratives that often fuel reproductive rights movements.

Use critical and inclusive language in research and writing.
Choose non-institutional artifacts of study.
Organize letter writing, phone banking, and other contact campaigns and protest techniques.
Disseminate information and resources to help individuals and providers.
Translate or represent complex legal and technical language in accessible oral, oral, and visual rhetoric.
Strategize messaging and context to inform and advocate for rhetoric that advance reproductive rights.
Investigate the development, structure, and evolution of local, state, and federal reproductive rights legislation and judicial opinions.

The legal right of individuals to reproductive healthcare services and education with a specific focus on the belief that abortion, contraceptives, sexual education, and family planning should be safe, legal, and accessible.

Disciplines in technical rhetorics provide a lens for examining the language of laws, legislative proposals, and judicial opinions. They can also examine the implementation of such laws and legal decisions and how they shape (or fail to shape) policies and practices of localities and organizations. Finally, these disciplinary areas can inform and theorize activist discourses, protest practices, and organized political campaigning.

The physical, mental, and emotional well-being in matters connected to reproduction and sexuality, typically facilitated through access to comprehensive medical care and education.

Disciplines in technical rhetorics can examine how "reproductive health" is defined and can help theorize the impacts of rhetorical and linguistic choices made by healthcare providers and consumers. It can provide strategies for more effective healthcare communication and more comprehensive and effective reproductive and sexual healthcare education and advocacy.

Create healthcare related curricula for broad audiences, both patients and providers.
Design educational artifacts of study that are accessible.
Protect systems, settings, and individuals who are targeted, and support those who are at-risk.
Apply linguistics and rhetoric for healthcare improvement and to share experiences.

The legal right of individuals to maintain personal control over our bodies, life decisions, sexuality, gender identity, and the choice to reproduce.
